Cove Community Garden
Project Update & Notice of Works

28 November 2024

Dear resident,

Re. Installation of community garden fence: Work commences 9 December

The Cove Community Garden Group Incorporated formed in 2021 for the purpose of starting an inclusive, accessible, and inviting community garden in Hallett Cove. The group applied to council to start a community garden on Perry Barr Farm Reserve.

Council consulted with the local community on the community garden proposal in February 2023 and then again in November 2023, after the community garden location and concept plan had been revised based on community feedback.

The community garden was endorsed to proceed by Council in March 2024.

The community garden will be built in stages and is propsoed to include:

- Secure fencing
- Tool shed
- Community orchard
- Accessible garden beds
- Community garden beds
- Members garden beds
- Rainwater tank
- Pergola
- Compost bays
- Greenhouse
- Pollinator garden

Initial works to install site fencing will commence on **Monday 9 December** and are expected to be complete by **Friday 20 December 2024**

Works will take place from **7am – 4pm, Monday to Friday** and impacts to local residents will be minimised as far as possible. When the construction for the commmunity garden is completed it will be open to the community twice a week, one morning during the week and one morning during the weekend.

More details on the design can be accessed on the project website:
