MORPHETTVILLE SA 5043

Morphettville Park Tennis Club is a thriving club situated in the western suburbs of Adelaide. This 4-court facility has a long and proud history of over 60 years and offers a range of tennis activities to a strong membership base and the local community.

Our activities currently include:

- Competition tennis for seniors and juniors in both summer and winter seasons (singles, doubles and mixed formats). Summer season from October - March and the winter season from May - August.
- Both junior and adult coaching. Sessions occur from Tuesday - Friday with our dedicated Club Coaches.
- Junior training sessions held on a Monday afternoon/evening during competition times.
- Senior training sessions held on a Thursday afternoon/evening during competition times.
- 'Men's Shed' social tennis opportunity weekly on a Tuesday evening– all year round.
- Cardio tennis – weekly for fitness and fun – all year round. Sessions are held on a Wednesday evening from 6pm - 7pm.
- Pickleball – one of the fastest growing sports in the world. Coaching and learn how to play (Tuesday mornings), Pickleball tournaments (ad hoc), Friday night competition and Sunday afternoon social play.

In future, we hope to also provide:

- Ladies social tennis - weekly on a Monday evening. Fast 4 format.
- Other social activities for both our senior and junior members, such as 1-point tournaments.

The Club also has 'Book A Court' facilities, which enables members and non-members to book a court online for a set fee, resulting in consistent court usage outside of competition and coaching times. This system reduces the risk of vandalism to the courts, nets and clubrooms and enables the limiting of non-tennis activities, such as use of skateboards and scooters that could cause damage. It also reduces the impact on local residents by allowing the lights to be on only when the courts are booked. A curfew on the lights is also in place resulting in the lights not being allowed to be used beyond 9.30pm at night.

Morphettville Park Tennis Club is striving to working closely with Marion Council for the re-development and enhancement of our tennis clubrooms. Our club has been a cornerstone of the local community for many years, and these improvements will significantly contribute to our mission of promoting health, fitness, inclusivity and social engagement through tennis activities. The redevelopment is also strongly aligned with the Marion Council's Strategic priorities of 'Liveable - create and maintain safe, attractive and accessible public places and facilities' and 'Community - we are a friendly, inclusive and connected community where everyone belongs'.

One of the key focuses of our clubroom upgrade is improving the accessibility of our facility. We believe that tennis should be a sport for everyone, and it is essential that our facilities reflect that belief. The proposed renovations will include wheelchair-accessible entrances and compliant bathrooms and changing facilities, ensuring that people of all abilities can comfortably and safely enjoy our club. By creating an inclusive environment, we hope to attract more participants from all aspects of the community and offer them opportunities to engage in the sport of tennis and tennis related activities.

The project will also enable the construction of restroom facilities external to the clubrooms but within the secure fencing of the club that will be accessible to participants utilizing the Book A Court feature of our club. Currently, restrooms can only be accessed internally within the club if the clubrooms are open/unlocked. There is no access to public restrooms within the local vicinity of the club.

The redevelopment of our clubrooms will benefit not only our current members but also allow us to expand our outreach to different segments of the community. The facility will be a modern, inviting space available for utilisation by other community groups who may be in need of a meeting place. It will also enable us to achieve our goal of developing a more sustainable facility, such as through the use of environmentally preferred materials and installation of solar panels. We will also continue to be committed to effective and responsible waste management processes. One of our members who lives locally assists us with managing our waste bins, which includes recycling. We also internally manage the cash recycling of cans, glass and plastic bottles.

Sincerely,

Claire Angus
