WORKS NOTIFICATION (5) OCTOBER 2023

Coastal Walkway Bridges: Project update

Dear Resident,

Work continues on delivery of the Coastal Walkway bridges project with the preparation of the support structures for each of the bridges now nearing completion. Walkway paths have also been completed at the northern end of Grey Road.

The bridge components have now been delivered to site and are in storage at our site compound at Fryer Street Reserve.

Construction of the bridges is expected to commence in January 2024. Kurnabinna Gully bridge will be built first, followed by the Grey Gully bridge. Both bridges are anticipated to be in place by February 2024.

Works will then focus on finalising the construction of and linking in the surrounding boardwalk paths. The overall project is expected to be complete by mid-2024.
