Information sheet

Austral Terrace parking alterations

What parking alterations are being proposed?

To address the concerns of vehicles driving along Austral Terrace at raised speeds, council is proposing to remove parking restrictions on the southern and northern sides of Austral Terrace, Morphettville. Timed parking restrictions will be in place on Tuesdays from 9 am until 1 pm only, to ensure safe and efficient access is provided for waste collection vehicles. Refer to the enclosed plans for further details.

Why do these measures benefit the local community?

These alterations aim to both increase the number of available parking spaces for the community. By providing on-street parking on both sides of the street, they will create natural traffic calming points. At these points, vehicles may have to slow down or stop to give way to oncoming traffic along Austral Terrace.

How will safety and line of sight be maintained at intersections?

According to Australian Road Rules, cars are not allowed to park within 10 metres of an un-signalised intersection, such as those without traffic lights. We have assessed all locations to ensure that sight lines are maintained. To reinforce this rule, solid white centre lines will be applied on all approaches to the junctions, complemented by yellow edge lines that indicate no stopping at any time on the opposite side. Please refer to the enclosed plans for more details.

Access to and from Morphett Road and Hendrie Street

A 20-meter safety bar treatment will be introduced at the junction with Hendrie Street, aligning it with the Morphett Road junction to prevent motorists from corner-cutting. This will also result in vehicles not being permitted to park within at least the first 20 metres (more in some instances due to property driveway locations) of either junction at all times.

Austral Terrace parking alterations

Bin collection days

To allow for the safe and efficient access for waste collection vehicles, timed 'No Parking' restrictions will be introduced at various sections along the southern side of the street where there are a number of unit blocks that result in a large number of bins placed on the kerbside.

This restriction will be operational on Tuesdays only, between 9 am and 1 pm to align with scheduled waste collection service. Outside of the medium density areas, cars will be permitted to park opposite one another, with the waste collection vehicle required to manually load the bin(s) when required, which is common practice throughout the metropolitan street network.

Will council monitor the change to parking restrictions?

Yes, if the changes are introduced council is committed to monitoring the street and undertaking a subsequent thorough review following a 12-month period. This could include further consultation with local residents.
